SOLES

SAFELIGHT

EVA SAFETY SOLE

EVA is one of the best materials in terms of impact absorption and lightness. The SAFELIGHT sole innovates with a special EVA compound specific for safety footwear: anti-static with excellent abrasion characteristics, non-slip and resistant to high temperatures up to 300°C.

EVA SAFETY

AIR TUBELESS

RUBBER SOLE

Excellent comfort, anti-slip performance, durability, resistance to fuels and oils, and is electrostatic dissipative conductive - ESD. This exclusive comfort technology - biomechanically tested by INESCOP - prevents foot and lower back pain, offers a smoother walking pattern and reduces impact forces by 55%.

MICHELIN NORTH

NITRILE RUBBER SOLE

Nitrile Rubber stands out for its great fuel, oils, and fire resistance temperatures up to 300°C. The MICHELIN NORTH sole is inspired by ice and mud tyres, providing a multifunctional sole with full traction, grip and control, designed for all outdoor work activities.

BASKET

RUBBER SOLE

Rubber offers excellent durability, resistance to fuels and oils, and is electrostatic dissipation conductive - ESD. The BASKET sole has excellent anti slip performance, both on wet and ceramic floors and its exclusive design is inspired in basketball shoes to ensure greater flexibility, comfort, and elasticity.

ATOMIC

TPU BICOLOR SOLE

TPU is a soft and flexible high-quality material with superior resistance to wear and abrasion. The bicolor ATOMIC sole is ESD certified and ensures full ground contact, providing excellent slip resistance characteristics. The rounded heel transfers the energy of the impact force from the heel to the elevation of the foot, increasing the perception of comfort.

POP-ENERGY

E-TPU + RUBBER SOLE

POP-ENERGY sole ensures excellent grip and stability with its anti-slippery design and top traction control. The advanced stabilization and E-TPU cushioning provide shock absorption, while the pumping tri-system improves water evacuation for all-day comfort.

SKOVSON

NITRILE RUBBER SOLE

SKOVSON technology is made with a special high-performance, flexible compound and high levels of adaptability to the ground, for extra comfort and stability. Designed for mountain climate and outdoor work or activities, the SKOVSON sole is extremely durable, moisture-proof and provides top grip and traction even in slippery conditions.

SKOVSON

FUSION

PU | NITRILE RUBBER SOLE

The FUSION sole has a flexible and lightweight soft polyurethane midsole, which ensures excellent impact return energy and comfort for prolonged use. The hard nitrile rubber outsole provides extreme durability and resistance to fuels, oils and high temperatures.

NITRILE RUBBER

CITY

PU SOLE

Polyurethane is flexible, lightweight, and resistant to oil and 120°C heat. The CITY sole has soft polyurethane which guarantees excellent restitution of impact energy, softness, and comfort for prolonged use. It's extremely light, flexible, and elastic. It has good adhesion, good slip, and heat resistance.

TRIPLE SPEED

EVA & RUBBER SOLE

TRIPLE SPEED technology is based on the performance of sports shoes. The EVA midsole provides extra lightness, comfort, and impact absorption, while the rubber outsole design offers a self-cleaning system for no dirt accumulation, maximum anti-slip performance and optimal resistance to oil and abrasion.

TRIPLE DENSITY

PU SOLE + SMOOSH

The perfect combination of three different PU densities results in this TRIPLE DENSITY sole, with an extremely soft and comfortable midsole, a hard PU outsole for great grip and resistance to oil and abrasion and, best of all, the insert of SMOOSH technology in the heel to offer maximum comfort, impact absorption and rebound effect.

DOUBLE DENSITY

PU SOLE

This sole blend two different PU densities, where the midsole is extremely soft and comfortable, while the hard PU outsole provides great grip and resistance to oil and abrasion. The minimalist design of the outsole offers excellent traction, anti-slip and durability characteristics to get the job done - no matter the floor.

INSOLES AND INSOCKS

ZERO SHOCK COMFORT TECHNOLOGY

ANTI-FATIGUE INSOCK

Lightweight and supportive insole with HyperFoam+ cushioning for superior comfort, moisture control, and energy return throughout the day.

BIORELAX SYSTEM

ANTI-FATIGUE INSOCK

Anti-fatigue and anti-bacterial insole with an active carbon base. Super comfortable, 100% breathable, extra-light, anti-static, and made with recycled materials.

COMFORT

ANTI-FATIGUE INSOCK

Polyurethane foam insole with anti-static dots. Supports and stabilises the foot, optimising weight distribution and facilitating balance.

CARBONPRO^{RV}

ANTI-FATIGUE INSOCK

Made with the best conductive foam for great anti-static, lightness, and impulse performance. Microperforated for better air circulation, quick drying, and anti-odour.

ACTIVEFOAM HIGH DENSITY PERFORMANCE

ANTI-FATIGUE INSOCK

Made with special foam, this insole relieves pressure on the heel to promote active recovery and prevent muscle fatigue. Light, anti-static, breathable and very comfortable to wear.

ANTI STRESS ULTRA RECOVERY TECHNOLOGY

ANTI-FATIGUE INSOCK

Ergonomic insole with anti-fatigue and antibacterial properties, featuring an active carbon base. Ultra-comfortable, fully breathable, extra-light, anti-static, and made from recycled materials.

Q-FLEX

COMPOSITE INSOLE

Non-metallic and anti-static protective insole, made of advanced composite materials. Anti-perforation protection, with greater flexibility and ergonomic, thermally insulating.

STEEL

STEEL INSOLE

Stabilizing insole made of steel which, being metallic, offers high levels of anti-perforation. It also has anti-static and anti-perforation features.

CORK

CORK INSOLE

Made with high quality materials with excellent resistance to water, petrol, and oils. It's perfect for heavy and long-lasting physical work. It works as a thermal regulator, and it is also very flexible and has great breathability properties.

FLOAT

FLOAT INSOLE

Anti-perforation protective insole with non-metallic, sweat-absorbing, lightweight and flexible characteristics, which provides high levels of comfort. Ideal insole for shoes used for long daily routines.

TOE CAPS

FIBERGLASS

FIBERGLASS TOE CAP

Protects the toes against mechanical damage and pressures of up to 200 Joules. Does not disintegrate under high loads. It is thermally insulating. Up to 50% lighter than insulating steel.

CARBONLIGHT

COMPOSITE TOE CAP

Protects the toes against mechanical damage and pressures of up to 200 Joules. Does not disintegrate under high loads. It is thermally insulating. Up to 50% lighter than insulating steel.

ALUMINIUM

ALUMINIUM TOE CAP

Protects the toes against mechanical damage and pressure up to 200 Joules. Not subject to corrosion, has low thermal conductivity. Up to 50% lighter than steel.

STEEL

STEEL TOE CAP

This traditional, reliable, and safe toe cap protects the toes against mechanical damage and pressures of up to 200 Joules.

FOOTWEAR MATERIALS

PERWANGER®
PREMIUM LEATHER

This exclusive premium leather is waterproof, breathable, scratch-resistant, and highly durable even in rough and rocky terrain. The leather's water-repellent properties, colour and structure are guaranteed to keep you going for the long term.

ANILINE
PREMIUM LEATHER

High quality leather with excellent resistance to water, petrol, and oils. It is great for heavy physical work, long-lasting. This material is very flexible and has good breathability features.

NUBUCK
NUBUCK LEATHER

Soft treated leather, with excellent perspiration characteristics that significantly increase the level of comfort. Excellent resistance and durability.

SUEDE
SUEDE LEATHER

Treated leather with excellent breathability and flexibility characteristics. Not water resistant, but perfect for working in hot and dry weather.

TEXTILE
PREMIUM TEXTILE

Fabric with a soft treatment that enhances comfort. Designed to be resilient, it offers extraordinary strength and long-lasting durability, perfect for demanding environments.

MICRONUBUCK
POLYESTER FIBERS

Innovative material made of polyester fibers, water resistant and highly durable. Allows natural breathing. Prevents a wide range of colours that keeps with the shoe throughout its life. Animal Friendly.

MESH POROMAX
ABSORBENT LINING

Innovative technology due to a special structure of internal chambers that removes hot moist air over the top of the shoe and facilitates uniform temperature distribution within the shoes.

MESH SPACE 3D
MESH LINING

Special Mesh knit for excellent breathability and flexibility. The high durability of the material allows to keep the properties throughout the period of use.

DRY FEET KNIT
POLYESTER FIBERS

DRY FEET KNIT is a revolutionary technology that is highly breathable, flexible and abrasion resistant. The extremely malleable fibers are designed to easily adapt to the ankle and foot, while the anti-sweat proportions help keep the foot always dry even in hot and moist environments.

CORDURA®
PREMIUM TEXTILE

High-performance technical fabric made from nylon 6.6, offering outstanding resistance to abrasion, tearing, and scuffing. Lightweight, breathable, and quick-drying, it ensures comfort and durability even in tough environments. Ideal for footwear requiring maximum protection and long-lasting performance.

QUADRATEX®
POLYESTER FIBERS + TPU

Advanced fabric combining polyester fibers with a TPU coating for enhanced abrasion resistance and durability. Highly breathable and long-lasting, it ensures protection and comfort in demanding conditions. Ideal for footwear requiring a balance of flexibility, strength, and performance.

HYDRATEC®
WATERPROOF MEMBRANE

HYDRATEC® is a special membrane which absorbs the water vapor and removes it through the lining to the outside. This keeps the foot warm and dry even in extreme situations. The best feature is that the higher the physical activity, the more efficient the Hydratec membrane works. This technology also provides effective protection from low temperatures and rain.

WORKWEAR TECHNOLOGIES

POLARSKIN is an advanced body-warming technology, engineered with innovative materials that effectively retain and regulate heat. Designed to ensure optimal thermal comfort, it provides consistent warmth even in challenging environments, making it ideal for cold-weather applications.

SOFTSHIELD technology is an advanced protection technology designed to offer impact resistance and greater comfort. By utilizing lightweight, flexible materials, it minimizes water absorption and ensures optimal performance in harsh conditions, delivering both durability and ease of movement.

TWILLFAB technology is a textile technology that uses a twill construction to provide greater strength and durability to fabrics. It is characterized by its diagonal weaving pattern, which gives the material a more robust structure and a comfortable feel.

TWILLFAB PLUS builds on our original twill technology, offering increased durability and comfort through an enhanced diagonal weave. This design provides fabrics with lasting strength, breathability, and a soft feel, ideal for tough, everyday use.

UltraStretch™

UltraStretch™ offers exceptional elasticity, providing freedom of movement and superior comfort. With a fabric that adapts to the body, it ensures a feeling of lightness and flexibility.

FastDry™

FastDry™ fabrics absorb moisture, dry quickly and are tear resistant for extreme durability in the toughest conditions.

CORDURA®

Cordura is a technology known for its high durability and resistance. Developed primarily from nylon fibers, it offers great resistance to abrasion, tears, and punctures.

Thigh	29	30	31	32	33	34	35	36	37	38

HOW TO MEASURE

A - Chest: Measure just under arms and across shoulder blades holding the tape firm and level. If your chest falls between sizes, order the next size up.

B - Waist: Measure your natural waist, which is the narrowest point of your torso. It is usually located slightly above the belly button.

C - Hip: Measure the fullest point between your natural waist and crotch.

D - Thigh: Measure around one thigh at the widest point.

E - Sleeve Length: Measure from the shoulder to the longest point of the arm, slightly past the wrist, to ensure the sleeve length is appropriate.
